## **Community Statement**

**Date: Tuesday 13 August 2019 (Statement 1)**

Dear Community Member,

Following the loss of steam generation, we are currently experiencing a significant process outage, resulting in high volume flaring.

Our first priority remains the safety of our people and our surrounding communities, followed closely by minimising the community impact of flaring.

We are now developing plans to safely shut down plant operations to allow us to execute the necessary maintenance and eliminate flaring.

We apologise unreservedly for any concern that this event may currently be causing and will update further as timelines become clearer.

SEPA has been advised in accordance with our regulatory responsibilities.

For information about [flaring at FEP](#) please visit our [website](#), or Email: [fep@exxonmobil.com](mailto:fep@exxonmobil.com).

Regards

**Jacob McAlister**  
**Plant Manager**
