Community Statement

Date: Wednesday 14 August 2019 (Issue 3)

Dear Community Member

We have now started the process of safely shutting down our operation to execute maintenance on our boilers.

We have made the necessary arrangements to reduce the flow of gas coming from the North Sea, allowing us to begin the key step of taking our furnaces out of operation.

These steps will also start the gradual reduction of the flare.

We will keep you further updated as our team move this process forward, as well as timescales to fully stop the flaring.

For further information, please email fep@exxonmobil.com

Regards

Jacob McAlister
Plant Manager
