

6th March 2022

Dear Community Member

We wanted to let you know that we need to make the planned use of our elevated flare for a period during daytime tomorrow – Monday 7th March.

We do not anticipate that this will be a high volume flare, so are confident it will cause little community disruption.

The planned use of the flare is required to undertake a scheduled inspection of one of our product pipelines. This work also forms part of our HSE inspection regime.

To give our team safe access, we first need to clear any residual ethylene gas from the pipe, with the safest way being to send it to our flare.

We have provided our detailed plan to SEPA.

This process is completely planned and safe, and we will work hard to minimise any potential disturbance.

Should you have any questions, please let us know.

Regards

Martin Burrell, Plant Manager
